Potential *ICD-10-CM* diagnosis codes

The codes listed are provided for educational purposes only and are not a guarantee of coverage or reimbursement. Coverage and reimbursement may vary significantly by health plan, patient, and setting of care. It is the sole responsibility of the HCP to select the proper codes and ensure the accuracy of all statements used in seeking coverage and reimbursement for an individual patient. The codes included on the following pages are included as examples of potential codes that may be relevant for the IV formulation of COSENTYX[®] (secukinumab).

International Classification of Diseases, Tenth Revision, Clinical Modification (ICD-10-CM) diagnosis codes¹

ICD-10-CM diagnosis codes identify why a patient may need treatment (eg, conditions, diseases, related health problems, abnormal findings) and document the medical necessity for a patient to receive treatment with COSENTYX. You should review the health plan's guidance to ensure appropriate codes are selected based on the patient's medical record.
